

## Claims

### What is claimed:

- 5            1. A guide comprising:  
                        a frame having a viewing portion and releasably attachable to a computer  
                        screen;  
                        a first rod moveably attached to said frame wherein said first rod crosses  
                        said viewing portion;  
10              a second rod movably attached to said frame wherein said second rod  
                        crosses said view portion and intersects said first rod.
- 1            2. A guide according to claim 1, wherein said frame is attached to the computer screen  
                        by a mounting component.
- 5            3. A guide according to claim 2, wherein said mounting component includes an  
                        adhesive, a hook and latch fastener or a magnet.
- 3            4. A guide according to claim 1, wherein said frame has a quadrilateral shape.
- 5            5. A guide according to claim 4, wherein said rectangular shape is a rectangle having a  
                        pair of long sides and a pair of short sides.
- 20            6. A guide according to claim 5, wherein said first rod is oriented in a direction of said  
                        pair of long sides and said second rod is oriented in a direction of said pair of short sides.
- 7            7. A guide according to claim 6, wherein an intersection of said first rod and said second  
                        rod form a right angle.
- 25            8. A guide according to claim 7, wherein said first rod and second rod have high aspect  
                        ratios.
- 7            9. A guide according to claim 1, wherein said frame is transparent.
- 7            10. A guide according to claim 9, wherein said frame is made of acrylic.
- 7            11. A guide according to claim 1, further comprising a lip attached to said frame.

*Sub  
Am* 5 12. A guide comprising:

a frame having a viewing portion and attachable to a computer screen  
wherein said viewing portion is of a same dimension as the computer screen;  
a first rod moveably attached to said frame wherein said first rod crosses  
said viewing portion;  
a second rod movably attached to said frame wherein said second rod  
crosses said view portion and intersects said first rod; and  
a mounting component wherein said mounting component is used to attach  
said frame to said computer screen.

10 13. A guide according to claim 12, wherein said mounting component includes an adhesive, a hook and latch fastener or a magnet.

14. A guide according to claim 12, wherein said frame has a quadrilateral shape.

15. A guide according to claim 14, wherein said rectangular shape is a rectangle having a pair of long sides and a pair of short sides.

16. A guide according to claim 15, wherein said first rod is oriented in a direction of said pair of long sides and said second rod is oriented in a direction of said pair of short sides.

17. A guide according to claim 16, wherein an intersection of said first rod and said second rod form a right angle.

20 18. A guide according to claim 17, wherein said first rod and second rod have high aspect ratios.

19. A guide according to claim 12, wherein said frame is transparent.

20 20. A guide according to claim 19, wherein said frame is made of acrylic.
